

Docket No. 000742C1

Serial No. 10/613,625

AMENDMENTS TO THE DRAWINGS:

The attached three (3) sheets of drawings replace original sheets 2, 3, and 8.

These drawing sheets include changes to the only the legends of Figs. 2, 3, and 7; specifically, these legends have been amended to indicate "prior art".

Marked-up sheets are not being submitted separately because the amendments are straightforward and explained clearly herein, and no changes have been made to the substance of the drawings,

Attachment(s): 3 Replacement Sheet(s), marked "Replacement Sheet"

Docket No. 000742C1

Serial No. 10/613,625

REMARKS/ARGUMENTS

Prior to this amendment, claims 1-18 were pending in this application. Claims 1 and 16 have been amended to correct a clerical error (omission of an "and"); no other claims have been amended or added.

Interview, and this Supplemental Response

Applicant's attorney would like to thank the examiner for initiating an interview to discuss applicant's prior response, and specifically to discuss amendments made by applicant by reference to the publication rather than the application as filed. This supplemental amendment makes amendments to the specification based upon the application as filed, and replaces the previous amendments to the specification. The Examiner indicated that the amendments to the specification could not be entered; for purposes of the present response, applicant assumes that all other amendments were entered, and remarks considered.

Objections to the Drawings

The Examiner objected to Figs. 2-3 and 7-8, suggesting that they be designated by a legend such as ---Prior Art---. In the prior response, applicant amended the legend of Fig. 8 to read "Prior Art".

In this supplemental response, applicant also amends the legends of Figs. 2, 3, and 7 in accordance with the Examiner's suggestions for at least the following reason. The devices shown in Figs. 2, 3, and 7 are high-level block diagrams referenced in the specification as examples of devices that can be used with the present invention, and accordingly, applicant will follow the Examiner's suggestion and amend the legends to show "Prior Art". However, it should be clear that one or more features of the claimed invention may be implemented within the devices shown in these figures, even though labeled prior art. Particularly, Fig. 2 shows an example of a mobile cellular communication station in which the claimed invention can be implemented (c.g., see claims 16-18). Fig. 3 shows an example of a cellular basestation in which the claimed invention can be implemented (e.g., see claims 11-15), and Fig. 7 shows an

Docket No. 000742C1

Serial No. 10/613,625

example of a location server in which the claimed invention can be implemented (e.g., see claim 4).

In view of the foregoing amendments to the drawings and these remarks, applicant respectfully requests entry of the amended drawings and withdrawal of the objections to the drawings.

Objections to the Specification

The Examiner objected the Brief Description, suggesting that it be amended to indicate the Figures that are known in the art. In response, applicant has amended paragraphs 15, 16, 22, and 23 to indicate that the referenced figures are prior art, corresponding to the legend added (and discussed above).

In view of the foregoing, applicant respectfully requests withdrawal of the objections to the specification.

CONCLUSION

In light of the amendments and arguments presented above, applicants respectfully submit that the pending claims are patentable. Accordingly, reconsideration and allowance of this application is earnestly solicited. Should any issues remain unresolved, the Examiner is encouraged to telephone the undersigned at the number provided below.

The Commissioner is hereby authorized to charge any additional fees or credit any overpayment to Deposit Account No. 17-0026.

Respectfully submitted,

Dated: June 30, 2006
